

## PVC edges „chipboards collection“

# Die passende Kante zur Platte

Our new „chipboards collection“ includes edgebands made of PVC, which are perfectly matched to the chipboards from leading manufacturers. The processing-friendly recipe allows smooth processing of straight surfaces and rounded edges.

The standard widths 19 mm, 22 mm, 23 mm and 33 mm are available from stock.

Other widths and thicknesses are available on request. All edges are coated with primer on the back.
